About me

I am a second-year student of economic computer science at the University of Lodz. I am a precise person and I always try to finish everything so that every task entrusted to me is completed to the end. I am looking for a place where I can improve by learning new things under the supervision of professionals, so that in the future I can become a valuable member of the team.

Education

- **2020 – present** – University of Lodz
 - ✦ *Field of study: Economic Informatics*
 - ✦ *Specialization: programming*
- **2016 – 2020** – Zespół Szkół Elektronicznych im. Stanisława Staszica w Zduńskiej Woli
 - ✦ *Specialization: IT Technician*

Experience

- **01/2023 – present** – BSH Home Appliances – Dishwasher Factory (intern in the quality management department - product section)

Responsibilities:

- working with Excel (macros) and PowerPoint
- familiarization with the SAP system

- **07/2022 – 01/2023** – Mayka.pl Advertising Lab (Ruby on Rails intern)

Responsibilities:

- familiarization with Ruby and the Rails framework,
- support in creating code for one of the projects.

- **03/2020 – 04/2020** – K2 computer service in Zduńska Wola (*internship*)

Responsibilities:

- fault diagnosis, repair and maintenance
- keeping technical documentation of repairs performed

Abilities

- **good computer skills** – knowledge of MS Office (Word, Excel, Access, PowerPoint), Photoshop
- **programming skills:**
 - **Good knowledge:**
 - HTML with CSS
 - SQL
 - C#
 - **during further study:**
 - Ruby on Rails
 - Javascript
 - Flutter
- **knowledge of GIT version control system**
- **basic knowledge of Linux**

Dear Sir or Madam

I was pleased to read the announcement about internships in your company and I am writing to express my interest.

I have always been interested in computers and programming. That is why I am currently studying Economic Informatics at the University of Lodz at the Faculty of Economics and Sociology. During my studies, my interest in the subject of web programming and learning other programming languages has developed.

Computers and new technologies have always been the subject of my interest. Last year in early July I started an internship as a Ruby on Rails developer. During my internship I learned the basic principles of object-oriented programming using Ruby. I took part in one project, one of my tasks was to introduce functionality (gem I18N) to translate the website into English. I would like to expand my knowledge of web programming.

I am an honest and meticulous person. I learn quickly and that makes me like to learn new things related to IT. I have no problems with working in a team, I can also work independently, and it is not a problem for me to organize myself. A key detail of my ability to do the job is the attention to detail, I believe that this is an asset that gives me confidence that the task entrusted to me has been done correctly and satisfactorily.

I hope to have the opportunity to meet you in person to tell you more about myself and answer your questions.

Yours faithfully,

Michał Kasperek
